Abstract—This document is a template demonstrating the IEEE-conference format.

Index Terms—template; demo

I. INTRODUCTION

Travel forecasting models are based heavily on data provided by government statistical agencies, such as the US Census Bureau, the Bureau of Labor Statistics. In countries where statistical agencies are not as reliable, travel forecasting models are generally not developed or have data gaps. This demo file is intended to serve as a “starter file” for IEEE conference papers produced under L^AT_EX using IEEEtran.cls version 1.8b and later. I wish you the best of success.

A. Subsection Heading Here

Subsection text here.

1) Subsubsection Heading Here: Subsubsection text here.

II. CONCLUSION

The conclusion goes here.

III. ACKNOWLEDGMENT

The authors would like to thank...

IV. BIBLIOGRAPHY STYLES

Here are two sample references: Feynman and Vernon Jr. [1] and Dirac [2].
